BizConnect - A browser based solution for small and medium enterprises. The solution is seamlessly integrated with various business process modules like Financial Accounting System, Fixed Asset Management System, Procurement, Inventory Management, HR & Payroll Management etc. The solution has a good application access security system for accessing the application. The built in reports are very easy to generate and provides useful analytical information which helps in decision making. The output can be exported to any file format like excel, word, PDF etc. The Employee Web Portal is a part of **BizConnect** Solution which facilitates employees in automated leave application processing, employee account status, employees' publications, complaints & suggestions, activities & assignments, mailing system, broadcast messaging, etc.

INTEGRATIONS

The Business process integrations like Inventory to Financial Books, Payroll to Financial Books, etc. are seamless, modular and parameterized. **BizConnect** also provides an integration of inter Branch/Unit transactions which minimizes reconciliation between units.

REPORT

The reports are easy to generate, provide useful and analytical information which helps in quick decision-making. The outputs can be exported to any format specified by the user (Excel, PDF, Word, Rich Text Format etc.) The application has also an user driven report writer tool, which helps the user to generate information from database.

BARCODE

As an ERP the solution is open to integrate the barcode scanners/portable data terminals, which allows real-time data collection accurately and rapidly.

PROCESS ERRORS & GUIDANCE

The application has built in process error bank and the actions to be taken to complete the transaction.
